Professional Summary

Frontend-focused Software Developer skilled in building responsive web applications, scalable frontend architectures, and interactive user interfaces using React.js and the MERN stack. Experienced in REST API integration, real-time communication systems, frontend optimization, and component-based application development. Passionate about creating modern web experiences with clean UI design, efficient state handling, and performance-focused engineering practices.

Technical Skills

Languages: JavaScript, Java, Python

Frontend: React.js, HTML5, CSS3, Responsive UI Design, Component-Based Architecture

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication

Databases: MongoDB, MySQL

Core Concepts: Data Structures, OOP, DBMS, API Integration, State Management

Tools & Platforms: Git, GitHub, Postman, Linux, Node-cron, Vercel

AI Exposure: Generative AI Fundamentals, Prompt Engineering Basics

Projects

Campus Event Finder

React.js, Node.js, MongoDB

- Engineered a full-stack event management platform supporting responsive UI, real-time event updates, and live notification workflows.
- Built reusable React.js components and integrated REST APIs to streamline event interaction and frontend scalability.
- Implemented Socket.IO-based real-time communication and automated event reminders using Node-cron.
- Optimized frontend responsiveness, API handling, and state management to improve overall user experience and application performance.
- Designed clean and user-friendly interfaces focused on accessibility, responsiveness, and smooth interaction flow.

Personal Portfolio Website

React.js, JavaScript, CSS3

- Designed and deployed a modern portfolio platform showcasing projects, technical skills, certifications, and development achievements.
- Developed responsive layouts, interactive UI components, smooth animations, and scalable frontend architecture for enhanced user engagement.
- Improved frontend rendering performance and implemented reusable component structures for maintainable development workflows.
- Deployed using Vercel with GitHub-integrated deployment workflows.
- Live Demo: sushantm-portfolio.vercel.app

Achievements & Certifications

- Gemini Certified Student – Google for Education (2025)
- Completed AI & ML Masterclass organized by Eureka Association in collaboration with REVA University.
- Successfully completed Full-Stack Developer Industry Simulation focused on scalable web application workflows.
- Built and deployed responsive frontend applications using React.js and modern web development practices.

Education

REVA University

2023 – 2027

Bachelor of Technology in Computer Science and Information Technology
